

FLIGHTTRAY™

Our lightweight, reusable flight container for dignified transport

Our newest addition, the reusable **FlightTray™**, permits the secure and dignified transport of a burial casket containing human remains via air.

- 1** A rigid polyethylene **tray**: that contains body and embalming fluids and negates pesticide treatment in international shipment
- 2** a corrugated cardboard shower-proof "**jacket**"
- 3** retention **straps** **4** detachable **handles**

The result is a secure, lightweight (35 pounds) flight container certified for the ATA. The Flight Tray has a capacity of 600 pounds.
